SUMMARY

Senior Software Engineer with 8+ years of experience shipping consumer and enterprise products to millions of users. Specializing in React, TypeScript, and scalable frontend architecture.

WORK EXPERIENCE

Instacart   Remote
Senior Software Engineer   Jul 2022 – Present

- **B2B Platform:** Built enterprise features (spend limits, order approvals, tax exemptions, AI concierge chatbot) powering $3B GTV run rate across 100K+ activations with 37% retention for business profiles.
- **White-label Expansion:** Led client engineering for expanding Instacart Business to partner storefronts (Staples, GFS, Restaurant Depot), enabling B2B sales rep ordering workflows.
- **Cross-Platform Delivery:** Coordinated feature releases across web, iOS, and Android, defining technical architecture and leading cross-team alignment.
- **Performance:** Led home page latency optimization, improving page load times by 20% through monitoring and query optimization.

Cameo   Remote
Senior Software Engineer   Aug 2020 – Jul 2022

- **Fan Clubs:** Built Fan Clubs subscription platform with Stripe payment integration on React/Node.js, enabling recurring revenue across 40K+ celebrities.

Snap Inc.   Venice, CA
Software Engineer   Dec 2017 – Jun 2020

- **Geofilters:** Built React/Redux features for On-Demand and Community Geofilters plus internal content creation tools, reaching 190M+ daily active users.

Square (now Block), Nest, Coinbase   Remote
Contract Software Engineer   2014 – 2016

Inkling, Square   San Francisco, CA
Software Engineer (Intern)   2013 – 2014

EDUCATION

University of Waterloo   Waterloo, ON
Bachelor of Mathematics   2016

PROJECTS

Poker Bot: Game theory optimal bot using computer vision and precomputed game trees, profitably played 70K+ hands (lol.poker/bot)

Blackjack Simulator: Node.js-based probability simulation engine with training mode (blackjacktrainer.app)
